	Notes: This program successfully addresses CCSS within an intervention framework; its scaffolded reading and writing instruction is effective, employs best practices and is supported by research. Although this is an extensive program (materials) success can be achieved through core materials; teacher and student edition, software, and resources for differentiated instruction 1, 2, and 3.					
	Key Features: READ 180 Next Generation is a comprehensive system of curriculum, assessment, professional development, and family engagement tools that empower everyone to contribute to reading success. Designed to meet the needs of students, in Grades 9-12, whose reading achievement is below the proficient level, the program provides individualized and personalized instruction through adaptive instructional software, high-interest literature, whole- and small-group direct instruction in reading and writing skills, and strategic grouping support for data-driven differentiation. The core components of the program have been designed to address literacy and language problem areas for intensive, accelerated, and extensive reading instruction.
